**OFFICIAL ENDORSEMENT: INNOVATION AFRICA 2027, HARARE,
ZIMBABWE: 6 – 8 APRIL 2027**

On behalf of the Ministry of ICT, Postal and Courier Services, I am pleased to confirm our full endorsement and support for **Innovation Africa 2027**, to be hosted in **Harare, Zimbabwe, from 6 – 8 April 2027**. Following full Cabinet approval, this confirms the united commitment of the Government of Zimbabwe to hosting a landmark Pan-African summit focused on education, higher education, ICT innovation, skills development and the future of learning across the continent.

The Ministry of ICT, Postal and Courier Services recognises Innovation Africa as one of the continent's leading platforms for education, ICT innovation and skills development and we look forward to how this landmark summit will demonstrate pan-African commitment to digital transformation, ICT-enabled education, digital literacy, innovation, connectivity, cybersecurity, artificial intelligence and the implementation of new technologies that can strengthen education systems and improve opportunities for young Africans.

For our Ministry, Innovation Africa 2027 is especially important because it aligns closely with our ambition to build a connected, knowledge-based society with secure information systems by 2030. Our national ICT priorities include expanding access to modern, affordable and inclusive ICT services; promoting ICT literacy and utilisation; supporting digital innovation; strengthening secure digital infrastructure; and coordinating ICT development across Government and the wider economy.

A key strength of Innovation Africa is its unique meetings-based format and the structured program of scheduled meetings between African government delegations and industry partners. This model ensures that the summit is focused

on genuine outcomes, practical engagement and long-term partnerships. It enables ministers, senior officials, education institutions and companies to discuss national priorities directly, identify areas of cooperation and develop solutions that can support implementation across education and ICT systems.

We therefore warmly endorse Innovation Africa 2027 and encourage African ministers, senior government officials, industry leaders, development partners and all participants to join us in Harare from **6 – 8 April 2027**. We look forward to welcoming you to Zimbabwe and to sharing in a landmark moment for education, innovation and digital transformation across Africa.

Hon T.A. Mavetera, M.P
